GENDER BASED VIOLENCE & HIV & AIDS
26-27 February 2015, Protea Hotel O.R. Tambo, Johannesburg, South Africa

INTRODUCTION

The UN Declaration on the Elimination of Violence against Women defines gender-based violence (GBV) as, "Any act...that results in, or is likely to result in, physical, sexual, or psychological harm or suffering to women, including threats of such acts, coercion or arbitrary deprivation of liberty, whether occurring in public or private life." It is broadly defined as any harm to a person resulting from the power disparities caused by gender inequality.

According to a World Health Organization (WHO) report, among women aged 15-44 years, gender violence accounts for more death and disability than cancer, malaria, traffic injuries, and war put together. And in Africa, it is estimated that 1 in every 3 women will be raped in their lifetime. GBV poses a serious threat to both personal and public health. Those survivors who live through the experience may face unwanted pregnancies, STI infections (including HIV/AIDS), chronic pain, and/or disability. GBV also contributes to infertility and other reproductive health problems, and often leads to unsafe self-induced abortion. The psychological trauma of GBV leaves lasting scars as well; survivors may struggle with depression and are at higher risk for suicide; GBV also robs the community of productive women and girls, who would otherwise be working and contributing to the well-being of other community members.
BACKGROUND

The linkages between HIV/AIDS and gender-based violence have been identified in a recent literature review (Kistner 2003). For example: forced sex may directly increase the risk of HIV transmission as a result of physical trauma; violence or threats of violence may limit the ability to negotiate safer sex; inadequacies in justice systems may result in a disincentive to reporting rape and/or seeking post-exposure prophylaxis; childhood sexual abuse may lead to sexual risk taking in later life; and sharing HIV results may increase the risk of a violent response by a partner.

Organisations working in the field of gender-based violence are increasingly noting the impacts of sexual violence-related HIV infection, and are adopting integrated approaches in their programmes, analyses, training and advocacy work. There are, however, few inter-sectoral linkages.

Addressing the intersections between HIV/AIDS and gender-based violence requires re-orientation in social policies and organisational practices. This workshop provides insight into organisational experiences and perspectives of the obstacles encountered and approaches to addressing related issues. It can be used to facilitate the formulation of thinking on gender-based violence and HIV/AIDS, and assist in shaping programmatic interventions.

WORKSHOP HIGHLIGHTS & KEY BENEFITS

UNDERSTAND

• Gender-based Violence
• Gender based violence as a cause of HIV Infections
• Sexual and relationship difficulties result as a consequences of GBV & HIV
• Gender based Violence as a consequence of HIV infection
• Intersectionality" when working with GBV/HIV/AIDS
• How to intervene and address GBV and HIV
• The link between HIV/AIDS and Gender Violence
• Human Trafficking as Gender violence Policy and action

WHO SHOULD ATTEND

* Gender Co-ordinators
* HR Managers
* Gender Focal Persons
* Members of Women’s Forums
* Special Program Managers
* Budget officers
* Gender Practitioners
* Transformations Officers
* Peer Educators
* Immigration & Migration Officers
* Representatives from NGO’s & International organizations
* Community Leaders
* Counsellors

and also those whose line of work deals with and is vested in HIV/AIDS and Gender Based Violence.
DAY ONE: 26 February 2015

08:30 Registration

08:45 Gender Based Violence

- Economic Violence
- Physical abuse
- Genital cutting
- Sexual abuse
- Psychological abuse including belittling, humiliating an individual.

09:30 Sexual Gender-Based Violence as a cause of HIV infections

There is emerging evidence connecting the rapidly expanding HIV epidemic and SGBV, particularly among young women

- Gender-based violence may increase a woman’s risk for HIV infections
- The physiology of the female genital tract
- Forced sex
- Controlling behavior from male partners
- Multiple partners
- Transactional sex
- Ethnic cleansing

10:00 Intersectionality” when working with GBV/HIV/AIDS

This new concept is presently being used in the language of the UN. It means that there are a number of factors at play and it does not always play out in the same way: Different intersectionalities include;

(1) race
(2) disability
(3) profession
(4) class
(5) poverty
(6) wealth
(7) sex
(8) culture
(9) age
(10) citizenship
(11) education
(12) stereotypes
(13) religion
(14) caste
(15) power
(16) Violence
(17) sexual orientation
(18) Gender identity

10:30 Tea Break

10:45 Sexual Gender-Based Violence as a Consequence of HIV infection

Not only can sexual gender-based violence lead to HIV infection, but verbal as well as physical abuse it may also be a consequence of it. The risks associated with disclosure of HIV infection deter many women from revealing their serostatus. Fear of Abandonment, Rejection and DiscriminationAccusation of infidelity from families and their communities

11:15 Building African skills in GBV-HIV prevention

There is an urgent need for African skill development in high level research. Existing initiatives need full government, regional and international commitment.

Policy and Political appreciation of the value of and the way to use local high quality evidence related to GBV and its role in the epidemic can be transferred in brief executive retreats, which could be regional or national.

Short Courses can transfer the skills needed for detailed interaction on AIDS prevention research, with a special focus on GBV. A national or regional consensus team could standardise instruments and define and refine structured outcomes, this will build local skills and optimise research to national needs.

Hands-on training in GBV prevention implementation research: a combination of in-service internships, degree courses and fully funded research posts could help to bring this to pass. A permanent university research chair in GBV-HIV in each one of the eight priority countries should be a priority.

Community capacity is crucial for AIDS prevention Current HIV prevention research focuses on individuals and largely ignores the powerful influence of communities and networks. As communities engage in collective and cluster interventions, they can acquire the confidence and skills to lead their own HIV prevention initiatives.

Media sensitisation and training Much has been done across the region to use mass media for edutainment and awareness programmes. There is also room for general awareness among journalists of the GBV dimensions of HIV and AIDS

12:00 Explaining the link between HIV/AIDS and Gender-Based Violence (Relationship)

- Rape: this may directly increase women and girl’s risk of contracting HIV
- Abusive relationships: this may limit women’s ability to negotiate safe sex
- Women who experience sexual abuse in their childhood may engage in riskier sexual behavior as adolescents or adults, thus increasing their risk of HIV infection
- Women who receive HIV counseling and testing may be at risk of partner violence should they disclose their HIV status

In the light of the above, it is imperative that HIV and AIDS are addressed in the context of gender-based violence programs

12:30 Framework for a comprehensive model of care, support and prevention of SGBV

- Management of sexual violence at point of first contact with the survivor
- Psychological cancelling of rape survivors
- Strong links between police and health
- Sensitive approach to managing child survivors of sexual violence

13:00 LUNCH
14:00 Continuation

- Collection of forensic evidence
- New or strengthen community-based prevention strategies
- Physical (and psychological/emotional) between domestic or intimate addressed through messages communicated during the prevention strategies
- Screening for signs and symptoms of such violence during routine health consultations

14:30 Factors influencing Men’s Risk of Committing Violence

- Alcohol and drug use
- Hostility towards women
- Preference for impersonal sex
- Poverty, mediated through forms of crisis of male identity
- Weak laws and policies related to sexual violence

15:00 End of day one

**DAY TWO: 27 February 2015**

08:30 Registration and Morning Tea

09:00 Interventions Addressing Gender-Based Violence & HIV

- Increase work with communities in engaging boys and men in GBV and HIV
- Prevention efforts. Microfinance intervention to rigorously designed and evaluated interventions to address it
- Negotiation skills
- Economic independence from men
- Increased national-level dialogue on GBV as an HIV issue

10:00 Tea Break

10:30 Rationale for a Response to Sexual and Gender-Based Violence

- Treatment of injuries and clinical evaluation
- Pregnancy testing and emergency contraception (EC)
- Prophylaxis of sexually transmitted infections (STIs)
- HIV diagnostic testing and counseling (DTC) and Post Exposure Prophylaxis (PEP)
- Forensic examination
- Trauma counseling.

11:15 Some proved effective guidelines for research on Violence

- The safety of respondents and the research team is paramount and should infuse all project decisions.
- Prevalence studies need to be methodologically sound and to build upon current research experience about how to minimize the underreporting of abuse.
- Protecting confidentiality is essential to ensure both participants’ safety and data quality.
- All research team members should be carefully selected and receive specialized training and ongoing support.
- The study design must include a number of actions aimed at reducing any possible distress caused to the participants by the research.

12:30 Continuation: improved guideline for Research on Violence

Fieldworkers should be trained to refer participants requesting assistance to available sources of support. Where few resources exist, it may be necessary for the study to create short-term support mechanisms. Researchers and donors have an ethical obligation to help ensure that their findings are properly interpreted and used to advance policy and intervention development. Violence questions should be incorporated into surveys designed for other purposes only when ethical and methodological requirements can be met.

13:00 Lunch Break

14:00 Discussions and Exercise on SGBV

14:30 Solutions to Gender-Based Violence

Setting Measurable Goals Monitoring Progress Identifying options

15:00 End of Workshop
## GENDER BASED VIOLENCE & HIV & AIDS

26-27 February 2015, Protea Hotel O.R Tambo, Johannesburg South Africa

### R7, 250 per delegate excl vat

**REGISTRATION FORM**

**HOW TO PAY**
Payment must be received before the event to guarantee your place. Individual registrations cannot be shared.

You can pay either via direct credit or electronic funds transfer (EFT).

By Cheque payable to:
Mersey Corporate Consultants (Pty) Ltd

**ACCOUNT DETAILS**
Bank: First National Bank (FNB)
Account Name: Mersey Corporate Consultants (Pty) Ltd
Account Type: Business Account
Account Number: 62419522851
Branch Code: 259605
Branch Name: The Glen

SWIFT CODE (for international transactions):
FIRNZAJJ

**PLEASE INVOICE MY ORGANISATION**
My Purchase Order number is:
................................................................

**TERMS & CONDITIONS**

Confirmation:
All registrations will be deemed confirmed and subject to these Terms and Conditions.

Cancellations:
If you cancel within 4 weeks of an event running, a 25% cancellation fee will be charged for administration purposes. If you cancel within 2 weeks of the event running, a 100% cancellation fee will be charged. Please notify the office in writing of any cancellations or we will be obliged to charge you the full fee.

Changes:
Mersey reserve the right to make changes to this program with prior notice to the delegates.

Disclaimer:
Apart from the provisions of sections 43(5) and 43(6) of the Electronic Communications and Transactions Act, neither Mersey nor any of its agents or representatives shall be liable for any damage, loss or liability of whatsoever nature arising from the use or inability to use this communication or the services or content provided from and through this communication.

Payments:
Payment must be made prior to the running of any event. Mersey takes every care to ensure that prices quoted are correct at time of publishing however; bookings will only be accepted if there is no material error in the price advertised on the website.

Substitutions:
Registered delegates may be substituted at any time prior to the day without incurring an additional fee. Please notify the office in writing of the change.
